

*Amateur Radio Emergency Services (ARES):*

As an amateur radio operator, the Jackson County Emergency Management Director recognizes the critical need for emergency communications. Hams from Jackson County and the surrounding area are invited to participate in the Wednesday evening radio net via the KC9YE, 146.940 repeater, located near Northfield off Highway 121 and I-94. Area amateur radio operators participate in practice exercises, assist as weather spotters, and help us communicate during disasters such as the flood of 1993 and straight-line windstorm of 1998.
