

US 12/WIS 27 Culvert Replacement Project Jackson County

June 2024

Project Information

Placed in 1930, two culverts providing drainage under US 12/WIS 27 south of the village of Merrillan in Jackson County have reached the ends of their service lives. To address this, WisDOT is proposing the following work:

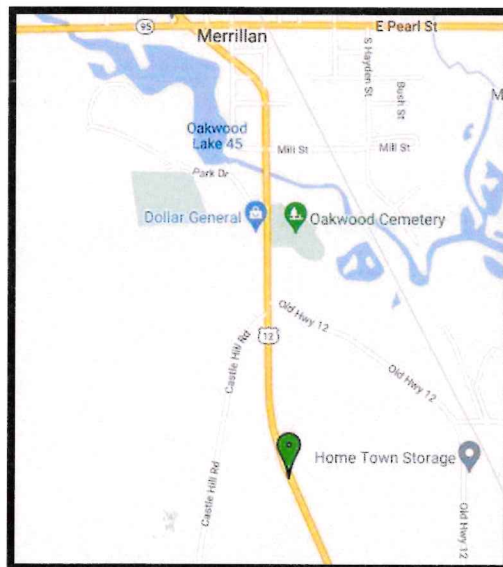

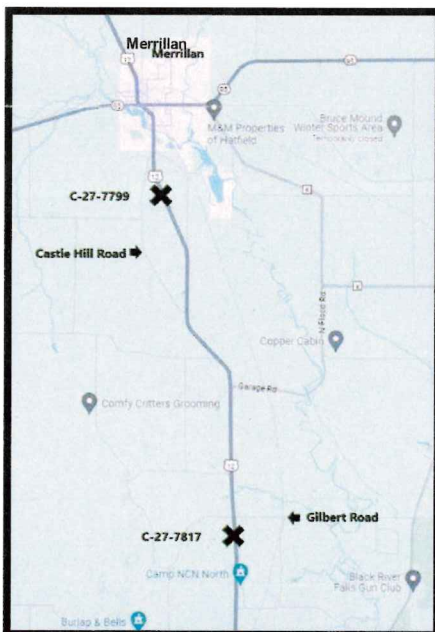

- 🚧 Replacing the existing culverts.
- 🚧 Replacing the roadway pavement over culvert replacement sites.
- 🚧 Replacing guardrail.
- 🚧 Regrading shoulders.

Traffic Impacts

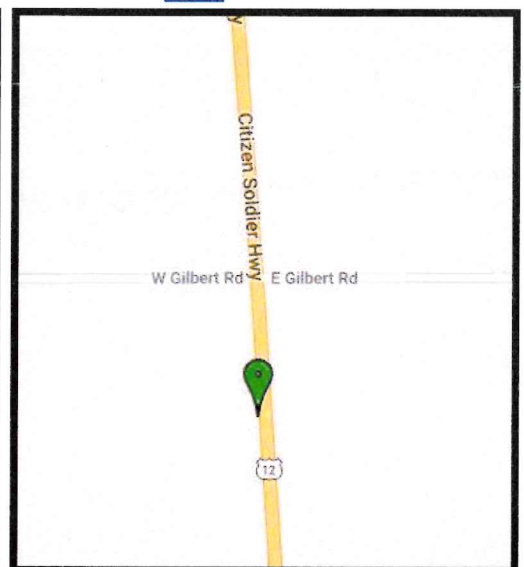

During construction, US 12/WIS 27 will be closed to through traffic, which will be detoured via I-94 and WIS 95.

- 🚧 The contractor plans to replace each culvert one at a time, with full closure of US 12/WIS 27 at replacement sites.
- 🚧 The northernmost culvert, C-27-7799, is south of the northern intersection of Castle Hill Road with US 12/WIS 27.
- 🚧 The southernmost culvert, C-27-7817, is south of Gilbert Road.
 - 🚧 The contractor plans to begin work at the northernmost culvert. Once the new culvert pipe has been placed, the site above it will be restored to gravel.
 - 🚧 The contractor then will proceed to the southernmost culvert and replace it.
 - 🚧 Once both culverts are replaced, the contractor will repave the roadway over the replacement sites.
